

Getting Started:

1. How do I log in? Click "Don't have an account? Register" Make a username & password you are comfortable with sharing with an Autolander Admin, fill out the rest of the basic info required. Confirm your email and you are logged in.
2. How do I connect my inventory URL? Click the configuration tab on the left side of the screen, scroll down to inventory feed. Open a separate browser window and search for your dealer on (cars.com/cargurus.com), find your dealers page. Copy the link into Autoland's inventory feed then hit "SAVE FEED"
3. How do I bulk post my first batch of cars? On Autolander click the "Post to Market" Tab on the left side of the screen. You will be able to see and filter through your inventory. Next to each car shown there will be a box in the top left corner click it. It will then appear orange with a check mark. Once you have selected the cars you would like to post click the blue "Post Selected" button. It will then show you the progress of the cars being posted.

Auto Price Tracking

1. How does auto price tracking work? For the cars you have yet to post to marketplace, Autolander updates the inventory and prices for you automatically every 8 hours. For cars that are currently posted on Facebook Marketplace go to the "Listing Updates" tab of the left. In the listing updates tab you will see vehicles with price updates. Click the box in the top left corner of each car then click the orange button on the top right "Process Selected" this will update the price to all your current listing on Facebook Marketplace.
2. Why didn't my marketplace listing update? Go to the listing updates tab on the left and check to see if cars with price updates are listed. If cars have a price update are not listed please reach out to your Autolander Admin.
3. How fast does it update after I change the price on my site? Autolander refreshes your dealer's inventory every 8 hours automatically.

Posting Tips

1. What's the best time to post? Night time will always be the best time to post, that is when most buyers are looking on Facebook Marketplace. Morning time will always be second best. At Autolander we recommend posting in the morning and throughout the day into night time. Don't post 20 cars at once; you will only be competing with yourself in the group and marketplace feeds. We recommend posting 2-5 at a time throughout the day.
2. How many cars should I post a day? Depending on your dealership size we recommend posting between 5-20 listings a day. Contact your Autolander Admin to see what they recommend.

3. Why are my listings getting low engagement? Never post 10-20 cars at one time! This is the worst way to post your inventory, when uploading 10 plus cars at one time Facebook sees it as spam and will treat it as such (Less clicks). We recommend posting 2-5 cars at a time throughout the day. Make sure the groups you are posting in are approving your listings. When you go to look at your listings 24 hours after posting. You should see what groups the listing has been shared in. If a group is not approving your listing change your groups in the configuration page on Autolander. Reach out to Autolander Admin if confused or don't understand.
4. Should I repost old listings? YES! Any listing that you have that is more then 2 weeks old with no traction or active leads. Delete the post and repost the car through Autolander.

Lead Management

1. Where do I see my marketplace messages? Make sure you have the Facebook Messenger app download on to your personal cell phone with notifications turned on! This is very important to having success with Facebook Marketplace. The faster you respond to messages the more Facebook promotes your listings.
2. How fast should I respond? As soon as possible. Buyers on Facebook Marketplace can be unpredictable sometimes. Waiting 10 minutes to respond to a customer could cost you a deal.
3. Can I respond to leads from my phone? Yes, we recommend you have Facebook Messenger download to your phone with notifications turned on.

Account Management

1. How do I update my card? Go to the configuration tab on AutoLander, scroll all the way to the bottom of the page you will find a box that says "Current Plan" Click the blue "Compare all plans" button, pick your plan and enter your card information.
2. How do I cancel? Go to the configuration tab on AutoLander, scroll all the way to the bottom of the page you will find a box that says "Current Plan" Click the red button "Cancel subscription"
3. How do I add a teammate? Log in to the managers account. Click the configuration tab on the left, You will see a box that reads " Team Access/ Personal Permissions" Click that box. You will then see a blue button that reads "Invite Member" click the box and add the sales person to the the account.
4. How do I change my password? On the AutoLander log in screen click the blue "Forgot Password Button" Enter your email address, you will get an email to change your password.

Troubleshooting

1. My marketplace photos look weird? Contact your AutoLander admin and send photos of pictures you are concerned about.
2. I am getting an error message when posting? Copy the error message and send it to your local AutoLander admin. We respond fast to any issue with posting.
3. My inventory feed stopped working? If you are using a cargurus or cars.com feed, please check online to see if your dealer is still advertising on one of the two platforms. If they are no longer using cars gurus or cars.com please contact your Autolander admin to get your feed supported. If you are on a custom feed please reach out to your AutoLander admin. If your dealer is still using cars.com or car gurus copy the link into your inventory feed under configuration and click "Save Feed."

ADD-ONS

1. What is AI Background removal? AI background removal will take the images off your dealer feed and crop out the car and give a completely new AI generated background. (The purpose of this is to make your posting look different from the rest of the cars on the Facebook Marketplace feed) If your dealer has background images or phone numbers it will remove them and give your car a clean professional looking background.
2. What is Ai Video Generation? Autolander will take the exterior photos used from your inventory feed listing and generate a one of a kind video of the car listed. (Video post on marketplace will always have more visibility than post without videos)
3. How do I turn add ons on or off? When you go to post cars in the "Post To Market" tab you will see a tab under each car that reads " AI Background" "Off Free" "Lite 8 CR" "Studio 15 CR." OFF Free will make a post with no background. LITE 8CR will make a post with background photos for exterior only and Studio PRO 15CR will give backgrounds for all photos. For AI videos you will see a check box. To post with a background select the option you would like to use then click the box in the top left corner by the car. You will then be able to click the blue button that reads "Post To Market" See example picture below.
4. How do I buy more credits? In the configuration page scroll to "Billing and Subscriptions" you will see options to buy credits that fit your needs best.
