Your quick-start guide to selling more cars on Facebook Marketplace

You're set up. Here's what's next.

The 3 things to do this week

1. Post 10 cars in the first 3 days. Use BULK posting (select 5-10 at a time).
2. Turn on auto price tracking. Your Marketplace listings auto-update when you change prices.
3. Respond to Marketplace messages within 5 minutes. Speed-to-lead wins deals.

Your power moves (do these in week 1)

BULK POSTING (your biggest time-saver)

→ Don't post one car at a time. Select 5-10 cars in your dashboard, hit publish. They post simultaneously. 30 seconds instead of 5 minutes per car.

AUTO PRICE TRACKING (your secret weapon)

→ When you change a price on your website, AutoLander updates Marketplace within minutes. No more outdated listings. No more leads asking about prices that aren't real. Turn this on for every active listing.

MOBILE APP (post while walking the lot)

→ Most top customers post 70% from mobile. Take a photo, paste the URL, hit publish. While you're standing next to the car.

SPEED-TO-LEAD (close more deals)

→ When someone messages your Marketplace listing, respond within 5 minutes. You'll get notifications on phone AND desktop. The faster you reply, the more deals you close.

Your 7-day checklist

- ☐ Day 1: Post 5 cars using bulk posting
- ☐ Day 2: Turn on auto price tracking for all listings
- ☐ Day 3: Download mobile app (if applicable), post 3 cars from phone
- ☐ Day 4: Respond to ALL incoming Marketplace messages within 5 minutes
- ☐ Day 5: Check the dashboard — see which cars are getting most views
- ☐ Day 6: Post 5 more cars (you should have 13+ live by now)
- ☐ Day 7: Hit 15+ live listings — the algorithm starts pushing your inventory hard

Common questions answered

Q: How many cars should I post?

A: Aim for 10+ in week 1. Customers who post 30+ in month 1 see 2x the leads. The algorithm rewards active accounts.

Q: My FB account got suspended. Now what?

A: Text your rep immediately. They've seen this before — almost always fixable.

Q: I'm not seeing many leads yet.

A: Check your listing count first. Under 15 listings is the #1 reason for low leads. Algorithm needs volume.

Q: How do I cancel?

A: Click your account portal link (in your welcome email) or text your rep. No questions asked.
